PROFILE SUMMARY

Detail-oriented QA Intern with hands-on experience in manual testing, test case design, defect tracking, and API testing using Postman across web applications. Skilled in functional, regression, smoke, and sanity testing with strong documentation abilities including test plans, defect logs, and structured QA reports. Possess excellent written and verbal English communication skills with the confidence to collaborate across technical teams and contribute to client-facing documentation and UAT coordination. Comfortable working independently in a remote environment with a self-driven, ownership-focused approach to delivering consistent quality outcomes.

SKILLS

Programming:	Core Java, Python
Manual Testing:	Functional Testing, Regression Testing, Smoke Testing, Sanity Testing
Test Management:	Test Case Design & Execution, Defect Tracking & Reporting
Automation Testing:	Selenium WebDriver, TestNG, BDD & Cucumber
Web Technologies:	HTML5, CSS3, JavaScript
Database:	SQL(MySQL, Oracle)
Tools & Platforms:	Eclipse IDE, IntelliJ IDEA, GitHub, Git, Postman
Methodologies:	SDLC, STLC, Agile Scrum, Bug Severity & Priority
Soft Skills:	Analytical Problem Solving, Communication, Time Management, Team Collaboration

PROJECTS

Manual Testing – Mimo & SoloLearn Applications

Tech Stack: MS Excel

- Designed detailed test cases in Excel covering user flows like course navigation, quiz functionality, and input validation scenarios
- Executed test cases and maintained pass/fail status with proper tracking of test execution results and coverage
- Identified functional and UI defects during testing and documented issues with clear steps and expected vs actual results
- Created and maintained organized test documentation including test plans, defect logs, and execution summaries, ensuring traceability from requirement to result
- Worked independently throughout the project lifecycle — from test planning to final reporting — demonstrating self-discipline, ownership, and the ability to deliver quality outcomes without direct supervision

Automation Testing – Flight Ticket Booking Web Application

Tech Stack: Java – Selenium WebDriver – TestNG – Maven – GitHub

- Developed automated test scripts for flight search, booking workflow, and passenger detail validation using Selenium WebDriver
- Implemented TestNG framework with reusable methods, assertions, and synchronization techniques for stable test execution
- Automated end-to-end scenarios including login, search flights, ticket booking, and form validation functionalities
- Managed project dependencies using Maven and maintained source code with GitHub for version control and collaboration

EDUCATION

Bachelor of Vocation (B.Voc) in Software Development | 2023–2026 (Pursuing)

Anantrao Pawar College Of Engineering Research(APCOER) , Parvati, Pune

CGPA: 8.37

COURSE (PURSUING)

Software Development Engineer in Test

SEED INFOTECH
